HI-LO ADJUSTABLE BASE

The Ultimate Adjustable Bed for
Complete Comfort & Care

ADJUSTABLE BEDS | MATTRESSES | FURNITURE | HEALTHCARE SOLUTIONS

LowRider by TrueMotion

HI-LO ADJUSTABLE BASE | HEALTHCARE RANGE

Designed for Supportive Care & Modern Living

Introducing the LowRider by TrueMotion - Australia's lowest Hi-Lo adjustable bed base. With an entry height of just 190mm, it can be adjusted to 660mm for safer transfers and ergonomic carer access. The LowRider offers unmatched comfort, support and convenience for home care and lifestyle needs.

As part of the TrueMotion Healthcare range, the LowRider offers a superior foundation for enhanced comfort and a better night's sleep. Its ultra-low entry height ensures safer transfers, while back and foot elevation provides ergonomic support.

With a sleek, Australian-designed aesthetic, the LowRider seamlessly blends innovative functionality with modern design, transforming in-home support.

LowRider Features

REMOTE CONTROL | MOBILE PHONE APP

1. Back and Foot Elevation

Fine-tune your posture by adjusting the angles to find your perfect position. Head and foot elevation can help alleviate conditions such as sleep apnea and acid reflux.

2. Hi-Lo (Height) Adjustment

Adjust the bed height from as low as 190mm to 660mm for easier transfers and ergonomic access for carers. This feature is especially helpful for wheelchair transfers or when carers need closer access. It is crucial for safely assisting users while maintaining ergonomic posture for carers.

3. Trendelenburg Position

Allows the bed to tilt downward which can help improve circulation, support specific medical treatments and enhance patient comfort. These positions also assist carers by making patient transfers, repositioning and medical tasks easier, reducing strain and improving efficiency.

4. Reading/TV Position

Easily raise the head section for relaxation and entertainment.

5. Preset Memory Positions

Save preferred positions for quick, one-touch access.

6. Massage Function

Personalise your relaxation experience with 3 adjustable vibration massage settings. Customisable intensities can improve blood circulation, relieve tension and provide relaxation.

7. Flat Position Setting

A one-touch button to return the base to a flat position is convenient for transitioning in and out of bed. It's an easy reset point that carers and users can access without multiple adjustments.

8. Reverse Trendelenburg Position

Allows the bed to tilt upward which can help improve circulation, support specific medical treatments and enhance patient comfort. These positions also assist carers by making patient transfers, repositioning and medical tasks easier, reducing strain and improving efficiency.

9. Zero Gravity Position

Zero-G relieves pressure on the spine by balancing body weight and aligning the body in a relaxed position. This can reduce swelling and alleviate pain, leading many users to experience enhanced comfort and improved sleep quality.

10. Wireless Remote & Phone App

Convenient control via an intuitive remote or smartphone app (iOS & Android).

11. Safety & Durability

Features built-in corner rails, battery backup, lockable castor wheels and smooth-lift functionality for secure use. Underbed clearance also provides clear access for patient lifters and overbed tables. The LowRider is constructed with heavy-duty materials to support up to 320kg.

12. Upholstery

Grey.

13. Mattress Compatibility

Features a breathable base platform with keeper bars to prevent mattress sliding. Compatible with any TrueMotion mattress to complete the full sleeping system.

14. Warranty

10-year warranty for peace of mind.

15. NDIS

Registered NDIS provider.

LowRider Benefits

HI-LO ADJUSTABLE BASE | HEALTHCARE RANGE

Why These Features Matter

The LowRider features are designed to enhance user comfort, accessibility and ease of care, making it a valuable tool for both users and their carers. The LowRider's ultra-low height is particularly beneficial for carers as it facilitates safer transfers, reduces strain during patient handling and ensures easy access for assisting with mobility. This adjustable base is a modern, practical solution for both supportive care and lifestyle improvement.

- **Enhanced Lifestyle:** Ergonomic support improves sleep quality and overall well-being.
- **Comfortable & Supportive Design:** Adapts to various sleeping and sitting positions, relieving pressure points for improved comfort.
- **Designed for Carers:** Easy-to-use adjustments and ultra-low height make patient transfers safer, reduce the risk of falls and offer smooth, effortless access for carers.
- **Built for In-Home Use:** With a quiet, reliable motor and stylish design, it seamlessly integrates into any home environment.

Who Can Benefit?

- **Carers** - The LowRider is built to support the needs of professional and family care providers.
- **Home Care Patients** - Designed for those who spend extended time in bed, this solution offers enhanced comfort and functionality, providing support without compromising on style.
- **NDIS Participants** - TrueMotion, a division of TrueBlue Mattress Pty Ltd is proudly NDIS registered. Our LowRider Adjustable Base can be an essential tool for eligible participants, supporting both independent use and carer assistance.

Ready to Experience?

The LowRider Adjustable Base by TrueMotion is setting new standards in home care, emphasising both comfort and functionality. It is ideal for those who value comfort, independence and an enhanced quality of life.
